January 28, 1999

Dear Mr. Green,

Better late than not at all!! Sorry that it took so long to get this information to you.

Packet 1 represents the names which William Lindsay recorded in the Blackhawk War Journal. The names were engraved in the monument on Memorial Hill. This recording took place in May of 1917.

Initally, I transferred the names from the journal to my PC. In the mean time, the file was lost. As you will note, I enclosed both a copy from the PC and a copy of the original recording. I noticed many differences in the spelling between what was in the wave and William's list. Would burial records be correct and available?

Packet 2 represents the names of those serving at different time periods. A comparison between the list in packet 1 and this one would ensure that each name is accounted for.

If you have any question or need me to refer to the original for clarification, please give me a call.

Regards,
Stan
